Personal

With over twenty seven years experience in theatre plus a career in live music and corporate events I have had the privilege of working with many talented people from all corners of the world. From the smallest single handed dramas to the largest festival crowds, I have gained invaluable knowledge of communication through sound and use these practices in my work today.

As a theatre sound designer my aim is to work extremely closely with the whole creative team to deliver a pure and coherent sound design that supports the piece and engages the audience. I am passionate about working with orchestrators and composers and I fully aim to help capture the exact musical journey and emotion required without compromising their work.

I have always believed in putting myself in the place of an audience member experiencing the production for the very first time. Thus creating something that is dynamic, comfortable and most importantly, enjoyable.

I specialize in sound effects and soundscapes for drama and post production and take great pride in perfecting every element of an effect to capture the precise mood for the particular moment.
